

Would-be PDM

Would-be PDM

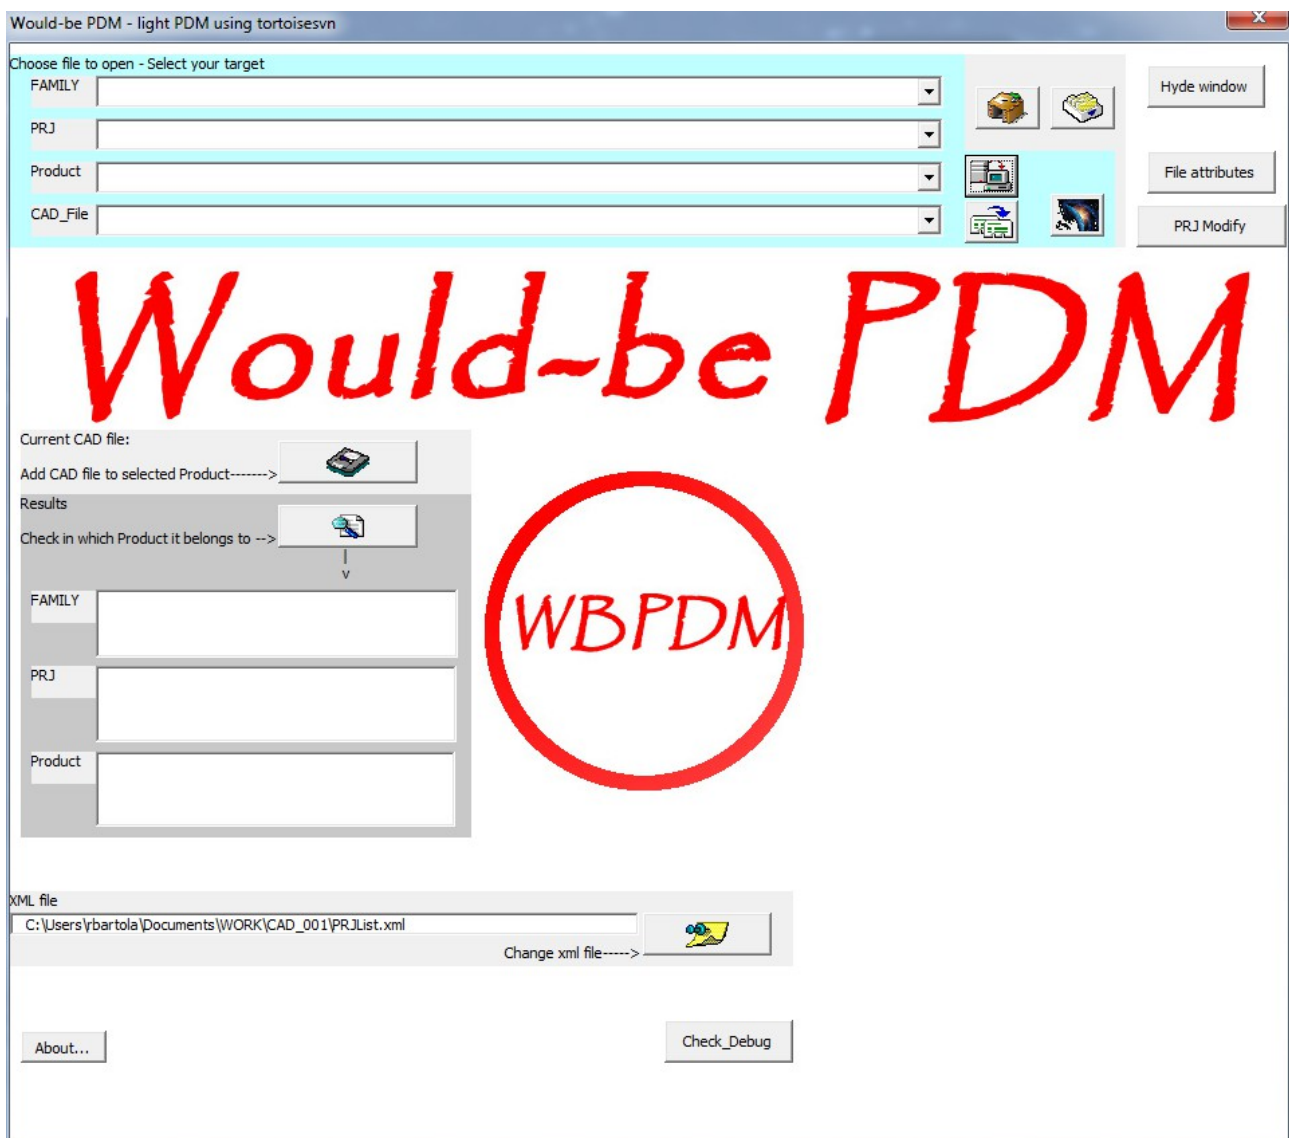

How-TO

Launch the main interface

- Click the icon «Begin» (or run the «Begin» macro)

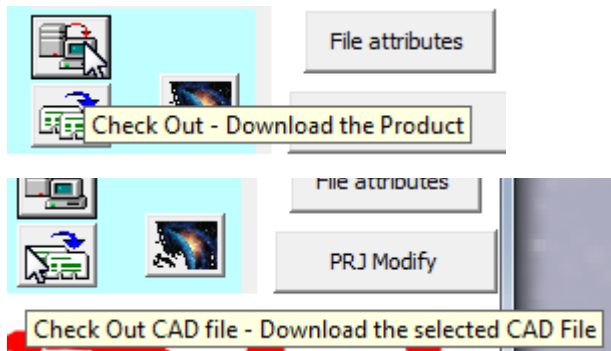

- Appears the main window

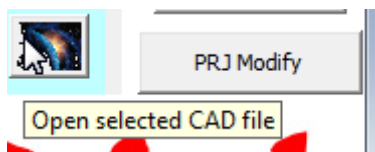

- The data for the Family / Project / Product / Files are in the xml file («PRJList.xml»)

- You should chose the Family, then the Project and the Product.
- In the CAD_File box you can see listed all the CAD files of the selected Product.
- You can update (Check out, download) the intere Product or the single CAD file

- To open the selected file click on the CATIA icon

- To show the attributes of current CATIA file

- To find the products in which the current CATIA file is involved

Enjoy
